Fire EMS Guidelines

The number of rescue units and paramedics is determined according to attendance and other risk factors.

For any public mass gathering or event that has an anticipated sustained attendance of 1,000 or more people, the KC Fire Department will complete a risk assessment of the event, regardless of other variables, size or scope of the event. Based on this assessment, the Kansas City Fire Department will contact the event organizer and arrange appropriate medical coverage as per the results of the comprehensive risk assessment of the event.

Please remember that certain general liability policies will have requirements regarding EMS coverage. Please be sure to consult your insurance policy to see what is required.
